

# Web Asset Tracking

Track the location, quantity, and condition of your fixed assets via the web.

Imagine how efficiently you could manage your valuable property if you had the tools to track the location, quantity, and condition of your fixed assets, all in real time. RedBeam Web Asset Tracking helps you track your assets:

- From any Windows Mobile, Android, or iOS device.
- Using barcode and/or RFID technology.
- Using the secure and reliable Microsoft® Azure cloud.

Available online or as a self-hosted system, RedBeam Web Asset Tracking delivers up-to-the-minute accurate purchasing, manufacturer and asset history data. Give your employees the freedom of online inventory control from anywhere, and from any device.

**Use RedBeam Web Asset Tracking on your desktop and any Windows Mobile 6.5, Android or iOS device. Real-time access from anywhere makes it easier than ever for your organization to:**

- » Increase Accountability
- » Meet Audit Requirements
- » Minimize Insurance Costs and Taxes
